Add variants list in product detail page	3
Create variants in Shopware	5

Plug-in settings

Go to Admin > Extensions > My extensions > H1 Variants on product detail.

Here you can set-up which columns you want to show in the variant list of the product detail page. You can even change the sorting.

	Variants on product detail by H1 Webdevelopment	Save
	Show thumbnail	
	Show topseller badge	0
	Show product number	
•	Show manufacturer product number	
0	Show purchase steps	
0	Show variant option names	
	Show price	
Show h	nighest or lowest price in table	
Low	ort

Add variants list in product detail page

Go to Admin > Content > Shopping Experiences > tab "Product page".

You will notice that the "Default Product Page Layout" cannot be edited (see the lock icon in the bottom-right corner). Therefore, we will duplicate this layout, allowing us to add the variant list block later.

Click on the "..." icon of the layout you want to duplicate, for example "Default product page Layout", and click on "Duplicate".

Now you can adjust the duplicated layout.

Shopping Experiences	Dutch	~	Create new layout
Layouts Sort by: Creat	tion date, desc	ending	•
All types Shop page Landing page Listing page • Default layout - Product page • Default product page Layout - C			
Blog page			

In the new layout, add the "HI Product Variants" block.

Go to the plus icon, select **"Commerce"** in the Block category, and then drag the "HI Product Variants" block into the layout.

Finally, ensure that all products are assigned to the new default layout.

Go to the **layout assignment** icon and click on **"Set as default layout"**.

Note: this only works if the products are not assigned to a different layout.

	ß	You can use layouts for several categories in your shop. Here you can see which categories already use this layout or assign it to other categories.	r
		Assign layout	
	~	Default layouts Please note that all categories that are currently assigned to a default layout will be reassigned to this layout and newly created category will automatically be assigned to it as well. Do you re want to use this layout as default? Set as default layout	ally

Create variants in Shopware

This is a default feature of Shopware.

Go to Admin > Catalogues > Properties to add variants based, for example, on

color or size.

6 Administration		Properties 👻 Search properties	Properties v Search properties		
⑦ Dashboard		Properties (4)	Dutch	✓ Add property	
Catalogues	Property	Property values	Description	Display in product filter	
	Blog colors	Blue, Orange		~	
	Blog types	Computers, Cars, Houses	Some testing types	~	
	Colors	Blue, Orange, Red		v	
Extensions	Size	S, M, L, XL		×	
Sales Channels 💮					

Go to Admin > Catalogues > Products > select a product > tab "Variants".

Click on "Generate variants" to select properties and to generate the variants.

	Test	product	、 、		Dutch	✓ Cancel Save ✓		
	Gen	eral Specifications Advanced	pricing	Variants Layou	t SEO Cross	Selling Reviews		
Variant All varian	ts Physical variants	Digital variants						
Search P Filter list 7 Generate variants Storefront presentation								
	Name 🗸	Euro	Sales	Stock	Product number	Media	E	
	Blue - XL	өө €150.00 €126.05042016807	0	0	SW10000.4	cə 💽 Upload files 😆		
	Orange - XL	өө €150.00 €126.05042016807	0	0	SW10000.8	ee Upload files 😆		

Ultimately, the product page with the variant list will be displayed on the storefront.
